

Issues — Guide

VTMS - vCrop Technologies

This guide explains who can raise an issue, who gets notified, and — the one part of this module that genuinely is not obvious — exactly who can act on a given issue, which depends on who raised it rather than the usual role hierarchy.

Who can raise an issue, and about what

Raised by	About
Teacher	Their own school — a problem affecting their teaching there (timetable clash, missing books, calendar conflict, etc.). Picks one of their own active school allocations, a category, and a description.
Head Teacher	A specific teacher at their school — a problem with or concerning that teacher. Picks any currently-allocated teacher at their own school(s), a category, and a description.

Only Teacher and Head Teacher can raise an issue. Cluster Coordinator, Org Admin and vCrop Admin can view and act on issues, but never raise one themselves.

Categories

Timetable, Curriculum Bifurcation, Books/Materials, School Calendar, Student List, Internet Issue, Question Paper Blue Print, Other.

Who gets notified when an issue is raised

Always notified	Also notified, conditionally
vCrop Admin, Org Admin	The school's Cluster Coordinator, if one is assigned
The school's Head Teacher	Skipped if the Head Teacher is the one raising it
—	If a Head Teacher raised it: the subject teacher is notified directly, since the issue is about them

Who can act — depends entirely on who raised it

Action rights are not based on the usual role hierarchy — they depend entirely on who raised the specific issue you're looking at.

Issue raised by...	Who can act (In Progress / Resolve)	Who cannot act
Head Teacher (about a teacher)	The subject Teacher, and vCrop Admin	Org Admin, Cluster Coordinator, and the raising Head Teacher themselves
Teacher (about their school)	Org Admin, Cluster Coordinator, Head Teacher, and vCrop Admin	The raising Teacher themselves

vCrop Admin can always act on any issue, regardless of who raised it. Everyone else's ability to act flips entirely based on the raiser — the same person (say, a Head Teacher) can act on issues teachers raise, but is locked out of acting on issues they raised themselves.

Actions and what they mean

Action	Available from	What it needs	Notifies
In Progress	Open only	Just a click — optional acknowledgement step	Raiser, subject teacher, school's HT and CC, Org Admin, vCrop Admin — everyone except whoever clicked it
Resolve	Open or In Progress	Mandatory resolution notes describing what was done	Same broadcast list as In Progress

You can Resolve directly from Open — going through In Progress first is optional, not a required step. Whoever last changed the status has their name shown right under the status badge in the list.

Who can even see which issues

Role	Sees
vCrop Admin	Every issue, everywhere.
Org Admin	Issues at schools in their own organization.
Cluster Coordinator / Head Teacher	Issues at their own assigned school(s).
Teacher	Only issues about themselves — whether they raised it or a Head Teacher raised it about them.

The Action trail

Every issue's View modal shows a chronological trail: who raised it and when, who marked it In Progress and when (if applicable), and who resolved it, when, and with what resolution notes (if applicable).
