

Requirements Workflow — Guide

VTMS - vCrop Technologies

This guide explains the full life cycle of a staffing requirement — from the moment a Head Teacher or Cluster Coordinator raises it, through approval, candidate resumes, and final teacher allocation. Read this once, and every stage of the pipeline and who can act on it should be clear.

The full pipeline

A requirement moves through five stages. Depending on whether the school has a Cluster Coordinator assigned, stage 2 may be skipped automatically.

Stage	Who acts	What happens
1. Raised	Head Teacher or Cluster Coordinator	Fills in School, Grade, Subject, number of teachers needed, classes per day, current syllabus status (mandatory) and optional notes. Goes to CC first if one exists for the school and the raiser isn't the CC — otherwise goes straight to Org Admin.
2. CC approval	The school's Cluster Coordinator (only if assigned, and didn't raise it themselves)	Approve moves it on to Org Admin. Reject ends it, with a reason, and also notifies Org Admin that CC rejected it.
3. Org approval	Org Admin or vCrop Admin	Approve moves the requirement into the Resumes stage. Reject requires a mandatory reason and ends the requirement.
4. Resumes	vCrop Admin uploads; Org Admin, CC and Head Teacher review, shortlist, select and reject	The longest stage — see the candidate journey table below. The requirement's own status stays "Approved (Shortlisting)" throughout, no matter how far any candidate has progressed.
5. Allocation	Whoever performs Teacher Allocation	Picking the final-selected requirement in the Allocate Teacher screen auto-fills school and classes/day, and can auto-match the teacher by candidate name. Completing the allocation marks the requirement Completed, recording the allocated teacher and completion date.

Requirement status reference

Status badge	Meaning
Awaiting CC	Raised by someone other than the school's CC, and a CC is assigned — waiting on that CC.
Pending Org Approval	Waiting on Org Admin or vCrop Admin to approve or reject.

Status badge	Meaning
Approved (Shortlisting)	Approved, and remains this status for the entire Resumes stage, regardless of candidate progress.
Rejected	Rejected at CC or Org Admin stage, with a reason recorded and visible on the record.
Completed	A teacher has been allocated against this requirement. Shows the allocated teacher's name and completion date.

Resumes stage — one candidate's journey

Once a requirement is approved, vCrop Admin uploads candidate resumes (a shareable Google Drive or OneDrive link, set to "Anyone with the link") for Org Admin, Cluster Coordinator and Head Teacher to review together.

Candidate status	Who moves it here	Notes
Uploaded	vCrop Admin	Starting point for every candidate — name, resume link, optional notes.
Shortlisted	Org Admin, CC or Head Teacher (any one of the three)	Each of these three roles has their own independent, one-way shortlist slot. Any single one of them shortlisting is enough to move the candidate forward — the other two slots stay open and are tracked separately, so you can always see exactly who shortlisted and when.
Selected (school)	CC or Head Teacher only	Requires the candidate to already be shortlisted. Marks the school's pick, awaiting Org Admin's final sign-off. Org Admin cannot perform this step.
Final Selected	Org Admin only	Requires the candidate to already be Selected (school) — cannot be done directly from Shortlisted or Uploaded. This is the candidate that becomes eligible for teacher allocation.
Rejected	Org Admin, CC or Head Teacher (any of the three)	Available at any point before Final Selected. Always requires a reason, and is final for that candidate — vCrop Admin cannot reject a candidate, only delete the record entirely.

Who can do what — quick reference

Role	What they can do in the Resumes stage
vCrop Admin	Upload candidate resumes and delete candidate records. Cannot shortlist, select, final-select or reject a candidate — those decisions belong to Org Admin / CC / Head Teacher.
Org Admin	Shortlist (own slot) and Reject at any earlier stage. Exclusively performs Final Select, but only once a candidate is already Selected (school) — cannot select at school level.
Cluster Coordinator	Shortlist (own slot), Select (school level) once shortlisted, and Reject at any earlier stage. Cannot Final Select.
Head Teacher	Same as Cluster Coordinator: Shortlist (own slot), Select (school level) once shortlisted, and Reject at any earlier stage. Cannot Final Select.

Other things to know

Only Head Teacher or Cluster Coordinator can raise a new requirement

The "New requirement" button only appears for these two roles. Org Admin, CC and vCrop Admin can view, approve, reject and manage resumes, but do not raise requirements themselves.

The CC approval step is conditional

If the school has no Cluster Coordinator assigned, or if the CC is the one raising the requirement, the CC approval stage is skipped entirely and the requirement goes straight to Org Admin / vCrop Admin.

Resume sharing must be public link access

When uploading a candidate, the resume link must be shared as "Anyone with the link" in Google Drive or OneDrive — otherwise Head Teachers and Org Admins reviewing it will not be able to open the file.

Final Select cannot be skipped to

A candidate must pass through Shortlisted and then Selected (school) before Org Admin can Final Select them — there is no way to jump straight from Uploaded or Shortlisted to Final Selected.

Completion happens automatically at allocation, not manually

There is no separate "mark as completed" action on the requirement itself. A requirement is marked Completed the moment someone completes the Teacher Allocation step and links it to that requirement — the allocated teacher's name and the completion date are recorded automatically at that point.

Everyone stays notified

At every stage — raising, CC approval, Org approval, and every shortlist / select / final-select / reject action on a candidate — the relevant roles (vCrop Admin, Org Admin, CC and Head Teacher) are notified automatically, so no one has to manually chase progress.
